

# SORTING MATERIALS

Fluorescent

Reflective

Here is a fun sorting activity that Brum would like you to complete. You need to look carefully at each object and sort them into the correct place on the Venn diagram. Use the hints below to help you sort your objects and materials into the correct part of the Venn diagram above.

## HINTS:

- Can you see bright colours which will show up in low light?  
Then the material is *Fluorescent*.
- Is there a shiny material that will reflect car and street lights in the dark?  
Then the material is *Reflective*.
- Does the object have both fluorescent and reflective materials?
- Where will you put the materials without any fluorescent or reflective materials?
